

getIntPropProcessData

getIntPropServiceParameterData

readSharedMemoryData

```
graph LR; A[getIntPropProcessData] --> C[readSharedMemoryData]; B[getIntPropServiceParameterData] --> C;
```

The diagram illustrates a data flow where two separate data retrieval processes, 'getIntPropProcessData' and 'getIntPropServiceParameterData', both feed into a single shared memory reading process, 'readSharedMemoryData'. The input boxes are white with black borders, while the output box is gray with a black border. Blue arrows indicate the direction of the data flow from left to right.
